

**A Proposal to Revise the Career and Technical Education Business Education Emphasis**

The proposed revision to the business education emphasis in Career and Technical Education (CTE) program will provide alignment with the other two emphasis areas in the methods portion of the curriculum. Students in all emphasis areas of CTE are required to take CTE 3400 in conjunction with their seminar course/s. Business education majors take two, two-credit seminars during the same semester while students with an emphasis in technology education and family and consumer sciences enroll in one, two-credit course. Changes in teaching materials, the infusion of computer technology into virtually every course and delivery methods over the past several years have allowed more efficient delivery of course materials and allow for the combination of seminar courses CTE 3401 Seminar of Teaching Keyboarding and Computer Application with CTE 3402 Seminar in Teaching Business and Accounting. Combining the courses into one seminar course will also allow student more flexibility in scheduling their myriad of requirements for teacher certification. **The two hours left from dropping the courses will be available for courses from CTE electives.** CTE 3401 and 3402 will be deleted and replaced with CTE 3405.

The attached catalog change will demonstrate the old and new catalog listings after the course proposal is approved by CAA.
