**HON1290-001: Sociology of Fashion**  
(CRN 99582)

**Dr. Katie Shaw, Mon1-1:50**  
**PEMB 1160**

This course delves into the fascinating world of clothing and its profound impact on society. By examining the social, cultural, and historical contexts of fashion, students will gain a deeper understanding of the ways in which clothing shapes and reflects our identities, relationships, and cultural values.

**HON1290-002: Democracy & Merit**  
(CRN 99583)

**Dr. Kevin Anderson, Wed 10-10:50**  
**COLE 2140**

This is a Political Science class that focuses on the political ideas that support Democratic institutions and help explain how American politics works. The central idea of a Democratic government is that every citizen is allowed to participate in the decision-making process (usually through voting) and the key question for the class is do we deserve the right to participate? How many people pay attention to politics and government? Will they make decisions that will be good for all?

We will read essays each week that discuss the way democracy should work and will have discussions that center on how close modern politics meets our political ideals.

**HON1290-003 Joy of Writing**  
(CRN 99584)

**Dr. Charlotte England, Wed 1-1:50**  
**PEMB 1160**

In a world where writing is often outsourced to AI, it is time to reconsider this fundamental skill which has been an important marker of human evolution and a tool of human genius for centuries. The class will look at what writing means, how it interacts with the development of the human mind and why, if practiced thoughtfully, it can be a source of joy and imaginative extension. We will draw on insights from neuroscience, psychology, and philosophy and consider some good old-fashioned grammar and rhetoric to help us hone our own powers of expression. Students can expect to discuss a wide range of readings in different disciplines and to participate in stimulating writing exercises, creative and practical.

**HON1290-004 Attention**  
(CRN 99585)

**Dr. Charlotte England, Thurs 1-1:50**  
**PEMB1160**

The father of modern psychology, William James, noted that what we pay attention to forms the content of our lives. We will investigate the nature of attention through psychology, philosophy and media studies. Students will also work through their own experiences of sustained attention and develop skills for writing observational prose. "Attention" is a thought-provoking seminar about big questions and their real-life implications.

**HON1290-005 Knowledge is Power**  
(CRN 99586)

**Dr. Richard England, Monday 3-3:50**  
**PEMB1160**

Centuries ago, philosophers observed that knowledge was a great source of power. In this class we will read reflections on this theme from philosophy, educational theory, and the history of science. We will then turn our attention to two crucial questions for our historic moment. How does the exercise of power affect the pursuit of knowledge today? And how does the rapid development of artificial intelligence affect our understanding of the value of knowledge?
